### 8.2 Exposure controls

**Risk management measures****Occupational exposure controls**

**Technical measures** : Use process enclosures, local exhaust ventilation or other engineering controls to keep airborne levels below recommended exposure limits. If user operations generate dust, fumes or mist, use ventilation to keep exposure to airborne contaminants below the exposure limit.

**Personal protection measures**

**Respiratory protection** : In case of dust formation use respiratory equipment with filter type particle filter P1 according to DIN EN 143.

**Hand protection** : Protective gloves of leather, contaminated or damaged gloves should be replaced.

**Eye protection** : Protective goggles with side shield or tightly fitting protective goggles

**Skin protection** : Skin covering working clothes; wear dust-proof overalls if large quantities of dust are generated.

**Environmental exposure controls**

**Technical measures** : Emissions from ventilation or work process equipment should be checked to ensure they comply with the requirements of environmental protection legislation. In some cases, fume scrubbers, filters or engineering modifications to the process equipment will be necessary to reduce emissions to acceptable levels.
